## Projects

---

### Movie App 1 / React.js, Tailwind CSS, Redux, TMDB API

- \* This is a fully responsive Movie Application which contains a list of movies, tv shows from the cloud sorted based on the most popular filter. User can change filter (trending, popular, rated, and preferred language) & users can see the movie details, trailers, reviews, by clicking on the movie, tv shows they like on the home screen.
- \* Designed and deployed a scalable real time data using TMDB API.
- \* Implemented a search feature for user experience so a user can filter movies, tv shows according to their choice.
- \* **Project Link:** <https://movie-app-nine-virid-51.vercel.app/>

### Portfolio Site 2 / React.js, Tailwind CSS, Framer Motion

- \* Portfolio is a compilation of user's academic and professional materials that exemplifies your beliefs, skills, qualifications, education, training and experiences.
- \* Implemented a feature of social-links, like Mail, Linked-In and Github, so we can easily connect with a user.
- \* **Project Link:** <https://dev-tiwari-portfolio.vercel.app/>

### Geo-Trip Site 3 / React.js, Tailwind CSS, Redux, TMDB API

- \* Geo-Trip is a fully responsive tour & travel website comes with a feature of cab booking, destination, flight booking, hotel booking, resort, tour booking, travel agency, trip vacation.
- \* Designed and deployed with a great UI design for all devices.
- \* Implemented a feature of selecting specific date and destination place (arrival & departure) so user can easily use it.
- \* **Project Link:** <https://flight-booking-website-seven.vercel.app/>

### Chatting App 4 / Tailwind CSS, Node.js, Express.js, Database (Mongo-Db), Passport.js, WebSocket.io.

- \* Chatting App is a digital platform that allows users to connect with others, share content like text, photos, videos, post. User can build their personal profiles and share post photos also they can like and comment on others post as well as they can see like and comments on their profile.
- \* It contains a features of user registration and authentication by using (Passport.js), uploading photos as post by using (Image kit) as well as one to one real-time communication using (WebSocket.io).
- \* User can update and change password by getting OTP feature on their registered email address using(Node-mailer) and can update profile photo also.
